Ronald P. Barrett

Vice President, Sales
U.S. Mainland

On June 1, 2010, Matson introduced the Household Goods community to a new Hawaii-trade pricing model. All fees associated with both the inland and ocean transportation that Matson performs is provided to the TSP on the Ocean Freight Bill (OBL) as a single bill for their shipment. Unfortunately, during implementation of the new service, the inland and bunker fuel charges that are listed on the mentioned OBL's were inadvertently mislabeled.

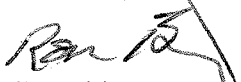

To further explain, using the below example, the "Fuel Related Surcharge" indicates the amount being billed to the TSP for the ocean (bunker) fuel costs. The charges listed below as "Bunker Fuel Surcharge" actually indicate the amount being billed to the TSP for the inland fuel costs.

TOTAL CUBE:	1,722			
		LINE HAUL CHARGE	CWT	10,000
		INVASIVE SPECIES FEE	UNIT	10
		FUEL RELATED SURCHARGE	PCT	3,771
		BUNKER FUEL SURCHARGE	PCT	1,943

It is also important to note, that not all Ocean Freight bills will list both fuel related charges. Only TSPs utilizing Matson's inland trucking service will notice both a Fuel Related Surcharge and a Bunker Fuel Surcharge on their OBL's.

Starting on August 16 Matson's bills will include the traditional "fuel related surcharge" and when inland service is provided a "trucker fuel surcharge". Please accept this notice as explanation of the charges provided.

Sincerely,

Ronald P. Barrett
